E. THE REMAINS OF TYPHOON TESS WILL BE NEAR 22613 AND WILL HAVE CLOSED CIRCULATION WITH EXTENSIVE BAD WEATHER PATTERN. THE UPPER LEVEL HIGH WILL BE CENTERED AT 32N AND 100 TO 110E WITH EASTERLY FLOW ACROSS SURFACE LOW AND ACROSS SOUTHWEST CHINA. LOW LEVEL MOISTURE IS BEING CARRIED INTO SW CHINA AND, DESPITE THE DRY AIR ALOFT ASSOCIATED WITH UPPER SYSTEM, IS CAUSING WEATHER TO DETERIORATE IN AREA OF INTEREST.

F. THE DETERIORATION IS CLOSELY ASSOCIATED WITH INFLUENCE OF TESS CIRCULATION AND MOISTURE. 24 HOURS BEYOND VALID TIME WILL SHOW FURTHER DETERIORATION WITH HIGH SURFACE MOISTURE REMAINING OVER SOUTH CHINA. IT WILL TAKE A FEW DAYS TO AKIN OPEN UP SW CHINA AREA.
